Alin-Andrei Hemeci

Machine Learning Engineer

Hi! I am Alin Hemeci, a fervent Machine Learning Engineer, dedicated to harnessing AI's power to solve complex challenges. Let's start creating innovative, data-driven solutions.

Experience

08/2023 - Present

Raiffeisen Bank

Machine Learning Engineer

In my role as a Machine Learning Engineer, I specialize in developing and deploying advanced machine learning models to address key business challenges.

My work involves not just algorithm optimization and data analysis, but also integrating these models into practical applications.

I leverage Streamlit for creating interactive ML prototypes, Django for robust backend development, and Vue.js for crafting responsive and user-friendly frontends.

This unique combination of skills allows me to deliver comprehensive solutions that are not only intelligent but also highly functional and user-engaging.

07/2022 - 05/2023

Bertrandt Group

Harness Design Engineer

Key responsibilities:

- 3D conception of electrical wiring harness for automobile development in CATIA V5 or V6.
- Analysis of functional architectural diagrams and dimensioning of wire harness systems
- Create 2D wire harness drawings

06/2020 - 01/2023

mystocks.ro - Personal Business

Stock Market Mentor

mystocks.ro represents an online stock market mentoring platform where I've worked with over 150 clients.

Key responsibilities:
